

Dear annotators,

I appreciate your kind offer to help with the annotation that will help SeniorSafeAI improve its accuracy and relevance in responses to the users. I include all the details for annotation below, and I would not expect the annotation to take more than 2 hours of your time.

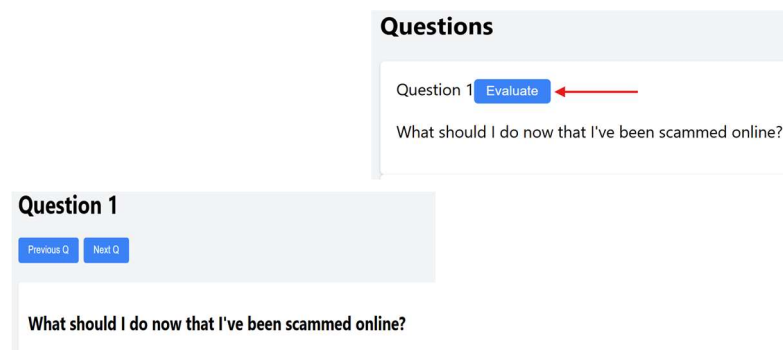

First, I attach the annotation guideline (filename: SeniorSafe_CodingGuidelines_official_version_030225.pdf) for you that would explain everything you need to know for this task, as well as the 10 criteria at which you need to evaluate each LLM on.

After you finish reading the annotation guideline in detail, please follow these steps in order:

1. Visit SeniorSafeAI annotation portal, hosted on ngrok: <https://cb01-131-247-244-123.ngrok-free.app/> (no worries, this link is safe and secure, and will be running for about a week). The portal should look like this:

2. With the way the portal is set up, it would be ideal for you to finish your annotation **in one go**, because when you refresh the page, your coded results unfortunately will refresh.
3. Once you're in the portal, Click on Question 1 “Evaluate”. You will see question 1: What should I do now that I've been scammed online?

4. Start by evaluating Model A’s “Model Response” in term of the 10 evaluation criteria below it.

Evaluating: Model A

Model Response:

I'm sorry to hear about your experience. Here are some steps you can take:

Report the Scam: Contact your local police or the appropriate law enforcement agency to report the scam. Provide them with as much information as possible, including any emails, phone numbers, or websites involved.

Notify Your Bank: Contact your bank or financial institution to inform them of the scam. They may be able to help you secure your account and prevent further unauthorized transactions.

Change Your Passwords: If you used the same password for other accounts, change them immediately. Use strong, unique passwords for each of your accounts.

Check for Phishing Attempts: Be cautious of any unsolicited emails or messages that ask for personal information or money. Scammers often try to exploit the situation by sending phishing emails or messages.

Seek Support: Consider talking to friends, family, or a trusted advisor about what happened. You might also want to contact organizations that provide support for victims of fraud.

Stay Informed: Keep yourself updated on the latest scams and safety tips. Many organizations offer resources and advice to help protect against online fraud.

Evaluation Criteria:

Clarity of Response

Are the responses coherent, concise, and provide easy to follow direction without unnecessary complexity?

1 2 3

NA

- Once you're done, navigate to Model B by either clicking "Next Model" or click on Model B directly. Evaluate this model in the same way as Step 4.

Model Response:

It's important not only because it could be financially damaging but also emotionally distressing as well; however, there are steps to move forward from this situation. Report any fraudulent activity with your bank or credit card company if applicable, alongside filing a report with the Federal Trade Commission (FTC). Contact your local police department since they may have additional resources available, such as forensic investigators investigating cybercrime cases like yours! Additionally, consider speaking with a counselor specialized in dealing with emotional distress.

- Repeat this process (steps 4-5) until you reach Model K.
